

Discovery at the Speed of Light

Spectral flow cytometry with the Agilent NovoCyte Opteon

Showcasing up to 5 lasers, 73 detectors, a demonstrated 45-color panel, and more powerful features:

- Exceptional performance with innovative optics
- Integrated fluidics sensors for consistent data and reliability
- Enhanced resolution with multidimensional autofluorescence subtraction
- Streamlined spectral experiment setup, analysis, and reporting
- Automation ready with autosampler and robotics compatibility
